 - More than 20,000 EPUB 3 titles in inventory
- Students respond with more page views and engagement
 - Responsive design allows flexible multi-device access
 - Rich media and interactivity > print under glass
- Publishers - large and small - can focus!

* By usage/page views

What is the EDUPUB Alliance?

- A global community for focused coordination of ongoing work among multiple standards organizations and their stakeholders (currently IDPF, IMS Global, W3C, BISG)
- Charged with creating a lightweight superstructure to help ensure that **existing** widely-adopted standards mesh and meet requirements of next-generation learning content
- **EDUPUB = Open Web Standards (inc. next-gen Portable Documents) + Educational Connectivity**

ALWAYS LEARNING

The **EDUPUB** Deliverable

a comprehensive model for the interchange and deployment of educational content

based on the Open Web Platform

expressed as an integrated set of specifications including EPUB 3 (IDPF), LTI, QTI, Caliper (IMS) and other emerging standards

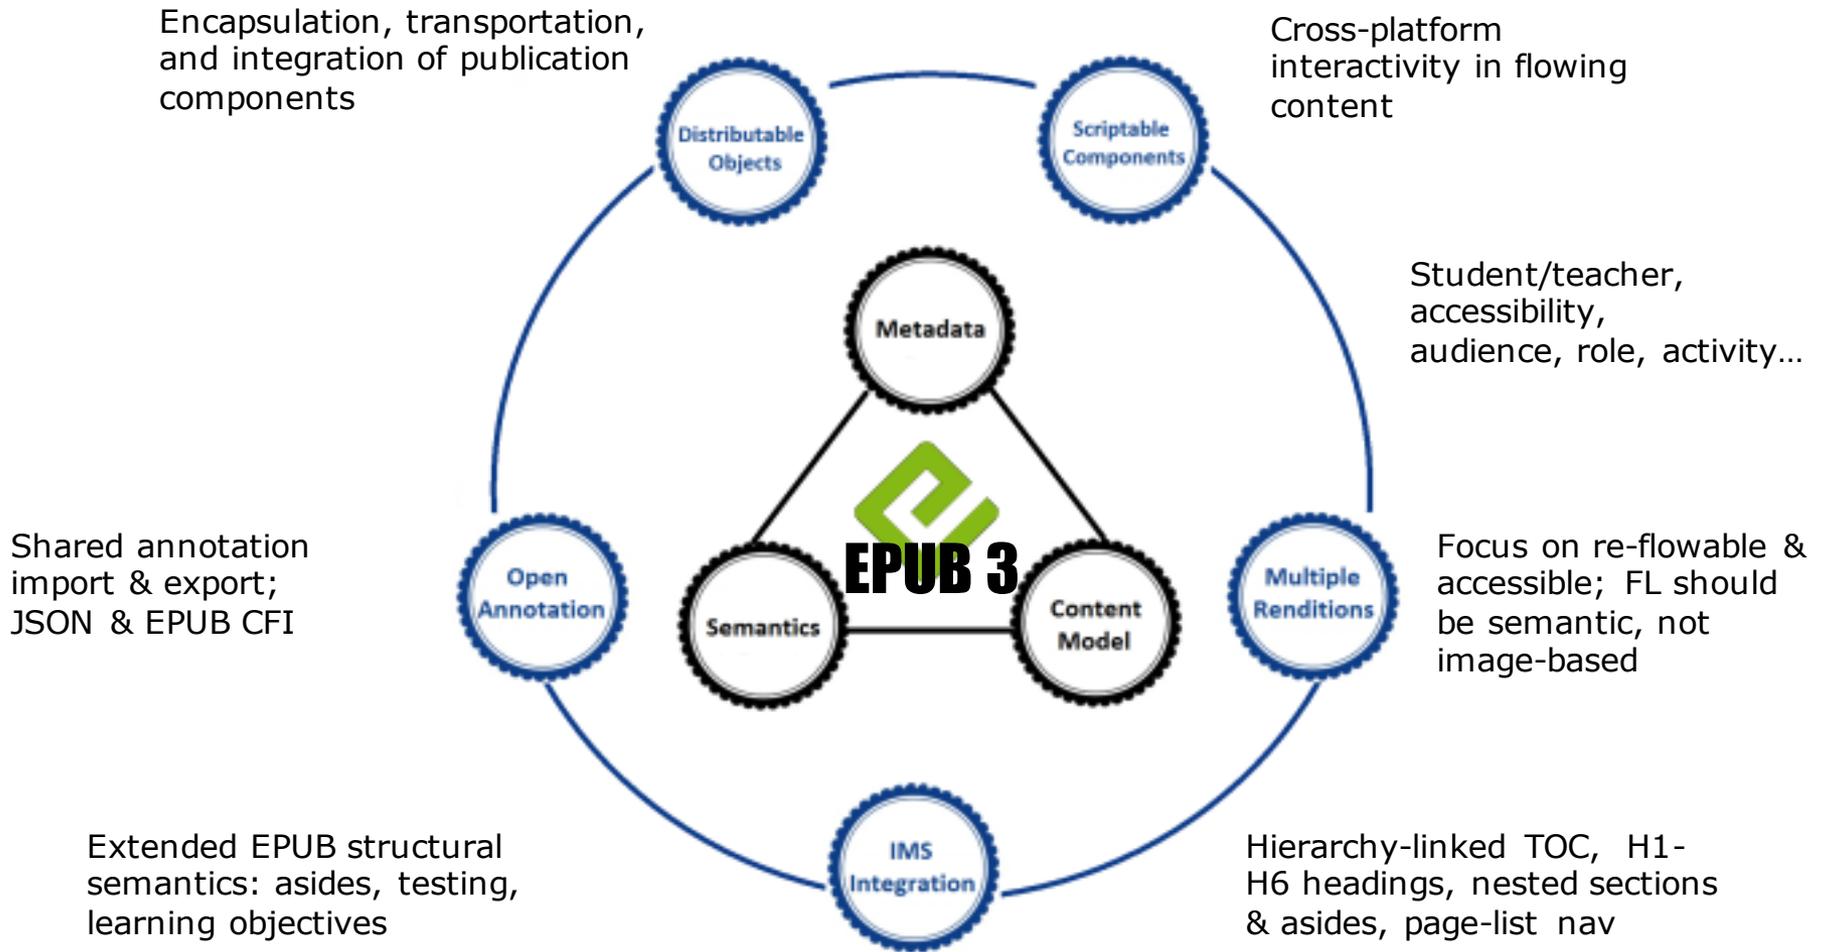

EPUB-centric Lens on EDUPUB

Equip EPUB 3 with everything needed for EDU content:

- Integrate existing IMS standards (QTI, LTI, Caliper)
- Deliver general EPUB capabilities needed for EDU (annotations, widget API, discrete entities)
- Develop EDU-semantic-enhanced profile of EPUB 3
- Facilitate rapid implementation (Readium open source)

EPUB adopters in general benefit:

- **EDU content pushes the envelope of required capabilities**
 - Interactivity
 - Connectivity
 - Complex information design
 - A11Y requirements

The LMS Side of the World

Global Utility is Essential

IDPF motto: *a11y and i18n = non-negotiable*

Different regions/stakeholders have different needs:

- Learning paradigms/styles
- Layout and Styling requirements
 - Reflowable vs Fixed Layout
 - Horizontal vs Vertical Layout
- Broad LMS integration supported (but not required)

EDUPUB must embrace and support these variances
